A "GO DEVIL."—George Brown informs the Courier that Robert Campbell, brother of Jas. L. Campbell, an Alpine county wood contractor, has invented a novel vehicle for riding in the flume. He calls it a "go devil," probably because it goes like its namesake.

The vehicle is three feet long, the same shape of a "V" flume, has closed ends, two wheels on the bottom and an iron brake with hooks over each side of the flume and works with the foot. It has a seat and runs at the rate of 45 miles per hour in a dry flume and 55 when a flume head of water is turned in, and by means of the brake can be stopped in going three box length. The weight is only about fourteen pounds.

George S. Hawkins has finished boring a couple of wells on the East Fork of the Carson which prove very satisfactory. The well put down for A. Miller, at Miller ville, is 56 feet deep and the water only lacks six feet of coming to the surface, and cannot be lowered by pumping. The next well was put down for Henry Egles to a depth of 48 feet. The water rises to within five feet of the surface, and is as good as can be found anywhere. The machine is now sinking a well at the East Fork school house. The district pays for the first hundred feet and there is talk of individuals subscribing to a fund for the purpose of sinking for artesian water.

Do They?

The scene described in the following from the Truckee Republican is one that can be witnessed once a month by anyone who claims to observe what is going around him. The Republican tells the story in this way:

Does the average man buy lottery tickets?

The afternoon overland train was coming west the other day, and at a station just above Auburn the newsboy received his consignment of San Francisco morning dailies which happened to contain the drawing list of the Louisiana lottery. He went through the smoker which contained twelve men of apparently as many different classes of occupations. He sold exactly eleven papers. In that car, and exactly eleven men turned first to the lottery column and then dove into their pockets for tickets or memoranda to compare notes. Eleven men eagerly scanned the numbers printed on their papers and then looked earnestly at the figures on the little slips of paper in their hands. No thing was heard but the monotonous rumble of the train for the space of two or three minutes, and then there were eleven sighs of assorted sizes. Then eleven little wads of paper went whirling out of eleven windows, and eleven copies of the great metropolitan dailies were propped carelessly on the seats or floor, having accomplished their mission. The twelfth man happened to be an agent who sells lottery tickets.

It is to the credit of Elko, Nevada, that it hangs a woman guilty of murder. It is a dreadful thing to hang a woman, but not so dreadful as for a woman to be a murderer. Evidently Elko possesses citizens who, when on a jury have some respect for their oath. In San Francisco Mrs. Poots would certainly have either been acquitted or pronounced insane, and would have walked out of court a free woman.—Daily Report.

Remark! the fact that four suicides occurred in one day in San Francisco this week, the Alta asks why the sick people do not hire themselves out for target practice to our Summer vacation militia. Because they want to die we suppose.—Grass Valley Tidings.

WHAT ON EARTH.—Is the reason people will not, cannot, or do not see any difference in cheap nostrums put up by Cheap John houses or irresponsible parties at enormous profits, rather than take a medicine of world wide reputation and one that is giving universal satisfaction at equal price? No medicine in the world is giving such unparalleled satisfaction for purifying the blood as BEGG'S BLOOD PURIFIER & BLOOD MAKER, and every bottle that does not do its work, will cost you nothing.—W.
